

OSUB Series Seasons Landscape Collection

Subwoofers for music and home theater are commonplace. In the Landscape Collection this same technology has been converted to withstand the harsh realities of an exterior environment. Encased in high-density composite materials the enclosure is buried in the ground and ported to the surface through a tube that is carefully tuned to reproduce the deepest bass frequencies.

Rugged Poly Composite Enclosure

All OSUBs are built with materials to withstand the harshest weather conditions.

In-Ground Installation

The minimalist design also comes with a paintable mushroom cap/port tube cover and allows Origin Acoustics Landscape subwoofers to blend seamlessly into diverse landscape environments

Uncompromised Punch

Origin Acoustics OSUBs utilize the ground as a natural reinforcement to the enclosure increasing bass output—emulating the depth and clarity of an indoor environment.
